

## **EBC Briefing COVID-19 detection and vaccination**

9 March 2021, 4:00-5:30pm

Japan, while figures have been volatile, has seen fewer cases compared to other countries, among them Europe. On the other hand, compared to Europe, Japan has been late to the party in terms of starting its vaccination programmes.

In this webinar, we will hear from two experts on both detection and vaccination of the COVID-19.

**Mr. Shinichi Eda of Roche**, member of the EBC Medical Equipment and Diagnostics Committee, will offer his expertise and insight into the detection of the corona virus through PCR-testing and anti-gen testing.

**Mr. Stefan Woxström, President of Astra Zeneca Japan**, will talk about the vaccine and vaccination. As we all know, Astra Zeneca has been at the centre of the development of one of the vaccines.

A session of Q&A will follow.

When: 9 March from 4:00pm

Where: Webex link will be presented at confirmation of sign-up

How to register and send your questions: [ebc@ebc-jp.com](mailto:ebc@ebc-jp.com)

Looking forward to seeing you !
