

# Digital Automotive Summit

## November 16<sup>th</sup>, 2023

### MISSION:

The **Digital Summit** will bring together industry, policy and advocacy leaders of the Japanese and European Automotive Industry. Expanding and building on our speakers' keynotes, we'll discuss the industry's future against the backdrop of an accelerated pace of digitalization and increasingly feeble markets. Viewed through a Japanese-European prism: What factors are tying our markets together, especially from a digital (policy) perspective? Is more collaboration among our stakeholders an avenue to future success? Best practices and insights will be shared leading to a panel discussion. After keynotes and panel discussion, a reception with networking opportunities follows with food and drinks served in the entrance forum of the Delegation of the EU to Japan.

### LOCATION:

[Europa House, 4-6-28 Minami-Azabu, Minato-ku, Tokyo 106-0047](#)
