partnership support

EXPANSION

Food exports and
global expansion

About “KANSAI FoodTech Open Platform”

METI-KANSAI is establishing the “KANSAI FoodTech Open Platform”, a collaborative initiative that connects companies, universities, research institutions, local governments, and other stakeholders in the Kansai region with partners overseas.

The Platform connects Kansai and the world through foodtech innovation, promoting collaboration in joint research, business partnerships, pilot projects, overseas expansion, and investment. At this kick-off event, we will provide opportunities for participants to build connections that may lead to joint research, business collaborations, and other partnership opportunities through presentations by overseas organizations, showcases of initiatives by Kansai-based companies and organizations, as well as exhibitions and networking sessions.
